# ABDALLAH MOHAMMAD FREHAT

**Junior Full Stack Developer | ASP.NET Core & Node.js**

**Amman, Jordan** | **+962795087159** | abdallahfrehat623@gmail.com |linkedin.com/in/abdallah-frehat-904857312 | github.com/abdallah-Frehat

## PROFESSIONAL SUMMARY

Software Engineering graduate and Full Stack Developer with hands-on project experience in C#, ASP.NET Core, ASP.NET MVC, Razor Pages, JavaScript, Node.js, Express.js, and relational databases. Built database-driven web applications with authentication, CRUD operations, responsive interfaces, and RESTful APIs. Gaining hands-on experience in full-stack web development at Dalil Information Technology.

## EDUCATION

### Bachelor's Degree in Software Engineering

Amman Arab University | 2025

**GPA:** 3.29/4.00 | **Grade:** Very Good

## TECHNICAL SKILLS

- **Programming Languages:** C#, C++, JavaScript, SQL, PL/pgSQL
- **Backend Development:** ASP.NET Core, ASP.NET MVC, Razor Pages, Entity Framework Core, Node.js, Express.js, RESTful APIs
- **Frontend Development:** HTML5, CSS3, Bootstrap, Responsive Web Design
- **Databases:** SQL Server, PostgreSQL, SQLite
- **Tools & Version Control:** Git, GitHub, Visual Studio, Visual Studio Code, pgAdmin

## SOFT SKILLS

•Problem Solving • Analytical Thinking • Teamwork & Collaboration • Communication Skills • Time Management • Adaptability • Ability to Work Under Pressure

## PROFESSIONAL EXPERIENCE

**Full Stack Developer Intern** — *Dalil Information Technology, Jordan* **2026 – Present**

- Develop full-stack web applications using HTML, CSS, JavaScript, Bootstrap, Node.js, and Express.js.
- Develop and integrate RESTful APIs to connect frontend interfaces with backend services.
- Work with PostgreSQL databases to implement CRUD operations and manage application data.
- Apply Object-Oriented Programming (OOP) principles using C# to build structured and maintainable applications.
- Use Git and GitHub for version control and source code management.
- Participate in technical assessments, hands-on projects, and individual project reviews to strengthen software development and problem-solving skills.

**Technical Support Specialist** — *Ministry of Municipal Affairs (Malak System)* **2024 – 2025**

- Provided technical support and troubleshooting for software, hardware, and system-related issues.
- Diagnosed and resolved 8–16 technical issues weekly to maintain smooth system operations.
- Supported approximately 20 devices and systems, handling technical requests and troubleshooting.
- Assisted with database-related tasks, data management, and system maintenance.
- Collaborated with team members to resolve technical problems and maintain system availability.

## PROJECTS

### Impact HR Platform (Employee Management System) — Graduation Project

*GitHub: github.com/abdallah-Frehat/Platform_Impact_HR*

***Technologies:*** *ASP.NET Core, C#, Razor Pages, Entity Framework Core, SQLite, HTML, CSS, JavaScript, Bootstrap*

- Developed a full-stack employee management platform using ASP.NET Core, C#, and Entity Framework Core with SQLite database integration.
- Implemented employee management features, including attendance tracking, leave requests, salary management, and employee records.
- Designed responsive user interfaces and an administrative dashboard using Razor Pages, HTML, CSS, JavaScript, and Bootstrap.
- Implemented user authentication, role-based access control, and CRUD operations to manage employee data.
- Performed debugging and testing to improve application functionality and reliability.

### Expense Tracker Web Application

*GitHub: github.com/abdallah-Frehat/expense-tracker*

***Technologies:*** *Node.js, Express.js, PostgreSQL, HTML, CSS, JavaScript, Bootstrap*

- Developed a full-stack expense tracking application with CRUD functionality.
- Built RESTful API endpoints and integrated them with a PostgreSQL database.
- Implemented responsive interfaces and asynchronous API communication using Fetch API.

### Food Delivery Web Application — ASP.NET Core Razor Pages Project

*GitHub: github.com/abdallah-Frehat/Food_Delivery*

***Technologies:*** *ASP.NET Core, C#, Razor Pages, Entity Framework Core, SQLite*

- Developed a full-stack food delivery web application using ASP.NET Core Razor Pages, C#, and Entity Framework Core with SQLite database integration.
- Implemented user authentication, session-based state management, and protected routes to restrict access to authenticated users.
- Designed and managed a relational database with Users, Orders, MenuItems, and OrderItems tables, including foreign key relationships, automated order timestamps, and dynamic menu management.

### Online Exam System — ASP.NET MVC Project

*GitHub: github.com/abdallah-Frehat/Online-Exam*

***Technologies:*** *ASP.NET MVC, C#, SQL, HTML, CSS, JavaScript*

- Developed a web-based online examination system using ASP.NET MVC and C# to manage exams, questions, and student results.
- Implemented user authentication and role-based access control to manage user permissions.
- Designed and managed database operations for exams, questions, and student results using SQL.
- Developed responsive user interfaces using HTML, CSS, and JavaScript, following the MVC architecture pattern to separate application logic, views, and data models.

### Skyline – Personal Web Development Project

*GitHub: github.com/abdallah-Frehat/abdallah-Frehat*

***Technologies:*** *HTML, CSS, PHP, SQL*

- Developed a web application using HTML, CSS, PHP, and SQL, integrating frontend interfaces with backend functionality and database operations.
- Implemented database connectivity to support data storage and retrieval.

### Candle E-Commerce Store — Web Development Project

*GitHub: github.com/abdallah-Frehat/candles*

***Technologies:*** *HTML5, CSS3, JavaScript*

- Developed a responsive e-commerce website featuring dynamic product filtering, real-time search, and interactive shopping cart functionality.
- Designed responsive user interfaces using HTML5, CSS3 (Flexbox and Grid), and JavaScript, including modal dialogs, toast notifications, and intuitive navigation.
- Implemented client-side functionality for dynamic pricing, burn-time calculations, and quantity management to enhance user experience.

### Airport Ground Operations System — C# Console Application

*GitHub: github.com/abdallah-Frehat/airport-ground-ops-system*

***Technologies:*** *C#, Object-Oriented Programming (OOP), Data Structures (Lists, Queues, Dictionaries)*

- Developed a C# console application to manage flight schedules, gate assignments, passenger bookings, baggage operations, and staff duties.
- Applied OOP principles and data structures (Lists, Queues, Dictionaries) to manage application data, passenger bookings, and standby queues.
- Implemented business logic for gate conflict detection, boarding validation, baggage weight limits, and staff working-hour restrictions.

### Space War – 2D Desktop Game

*GitHub: github.com/abdallah-Frehat/C-  Space-War*

***Technologies:*** *C#, .NET Framework, WinForms, Object-Oriented Programming (OOP)*

- Developed a 2D space shooter desktop game using C# and Windows Forms, featuring enemy movement, shooting mechanics, and real-time score updates.
- Implemented collision detection using bounding-box intersection logic (IntersectsWith) to handle bullet-enemy interactions and game-over conditions.
- Applied Object-Oriented Programming (OOP), event handling, and random enemy positioning to manage game objects and gameplay mechanics.

***Additional Projects:*** More software development projects are available on my GitHub profile: https://github.com/abdallah-Frehat

## CERTIFICATIONS

- ASP.NET Core Full Stack Development
- ASP.NET MVC Full Stack Development—The Hope International(2026)
- HTML Development — Orange Coursat (2026)
- CSS Development — Orange Coursat (2026)
- JavaScript Development — Orange Coursat (2026)
- Data Analysis Workshop — Masna3 Tech (2026)

## RELEVANT COURSEWORK

Data Structures • Algorithms • Database Systems • Object-Oriented Programming (OOP) • Software Engineering • Operating Systems

## LANGUAGES

Arabic: Native | English: Intermediate.
